## Enhancing the Mango Value Chain

Submitted by lbork on November 13, 2015

Martine Jean and Remise Dronette, members of the Mirebalais Association of Agro-Industrial Development, cut mangoes and place them on drying trays at the organization's fruit drying and processing center. Mango producers in Mirebalais, Haiti, can lose between 30-50 percent of their harvest due to the export industry's stringent exportation standards. This center transforms, preserves and markets dried fruit, especially dried mangoes, by using non-exportable mangoes that are normally discarded by producers. *Photo by David Rochkind*
